

TOTAL PLANT MANAGEMENT 2010, 11-12th March 2010, Melbourne

Plant performance is a dichotomy. Improvement of total plant performance is both simple and complex. Understanding what should be done is relatively simple, but implementing changes that will achieve and sustain optimum performance is extremely difficult. - *R. Keith Mobley, Author of Total Plant Performance Management.*

Total Plant Management 2010 forum addresses the top pressing issues faced by operators, manufacturers and producers on asset, people and compliance management to enhance plant availability, reliability and effectiveness.

This highly focused dual-track event will bring on the multi-industrial best practices of how integration, innovation, control and collaboration could tackle the complex, global, decentralised and outsourced operations

This comprehensive event covers 3 major tracks: **Asset, People and Compliance** Management for plant reliability and effectiveness. Follow your own agenda with a choice of 2 streams during breakout sessions:

Plenary: Keynotes and Compliance Management
Stream One: Critical Support Systems Management for Plant Reliability
Stream Two: Effective Resources Management for Operational Effectiveness

Key topics

- **Transforming** your site into a world-class operation to achieve total plant efficiency
- **Upscaling** your total plant performance against competitions
- **Strategically reassessing** operational gaps to optimise cost savings and tailor near-term business plans and long-term viability
- **Increasing** operating efficiencies by turning operational processes into strong organisational framework and strategy
- **Aligning** people, safety and sustainable performance to drive the overall business objectives
